## About Me

My name is Tanawash Khan, a Software Engineering graduate with a strong understanding of Object-Oriented Programming (OOP), data structures, and essential software engineering concepts. looking to expand my knowledge by pursuing a master's degree.

I have worked on multiple web projects as a front-end developer where I have converted Figma designs of projects into code Using HTML5, CSS, Tailwind CSS, and JavaScript.

I also have a strong command of C++ and Java. I have used these languages to complete my assignments and semester projects.

For our Final Year Project, we created a Travel Planner App and I worked on the Front-end development. Using React, HTML5, CSS, Tailwind CSS, and JavaScript.

## Professional Experience

1 year of experience as a Business Development Executive at CodeExperts Ltd.

Key Responsibilities:

- Bidding for a Software Project
- Proposing a solution to the client
- Gathering Software requirements from client
- Meeting with developers to discuss the project requirements
- Meeting with Clients
